

Daylily Lattice

A web extra from Quilter's Newsletter Magazine

These quilting motifs were designed for *Daylily Lattice*, a pattern in the April 2007 issue of *QNM* (issue 391). The Lily Leaf was quilted on the 2" inner border, and the Lily was quilted on the 4" patches in the alternate blocks. Both designs were created by tracing elements from the large-scale print used in the quilt's outer border and redrafting the tracings to make continuous-line quilting motifs. The dots indicate where to start and stop.
