

Flying Anvil

Paper Foundation Piecing Pattern

The Flying Anvil pattern appears in the May 2004 (#362) issue of Quilter's Newsletter Magazine. The traditional Flying Geese in the border of that pattern have been sized to fit evenly across the length and width of the quilt. We've printed templates in the magazine, but for those who enjoy paper-foundation piecing, this pattern can be printed and photocopied. You will need to make 42 copies

You'll also find a quilting motif that *QNM* artist Susan Geddes designed for the Y blocks on the next page. It can be used for hand or machine quilting.
